DETAILED ACTION

Drawings

1. The drawings are objected to because Figure 2 fails to properly identify by reference number the valve on the lower end (also mentioned in the disclosure on page 5, line 15-16). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. It is suggested that the applicant submit the drawings from the parent patent (United States Patent 6,532,814) for use in this application.

Specification

2. The disclosure is objected to because of the following informalities.

Page 1, lines 5-9 should be rewritten as follows:

This application is a division of United States Patent Application 10/384,959, filed 10 March 2003 and now abandoned, which is a division of United States Patent Application 10/006,556, filed 04 December 2001 and now United States Patent 6,532,814. Applications 10/384,959 and 10/006,556 are incorporated herein by reference.

Page 5, line 10 should read --valve 41-- in order to correspond with the parent patent.

Page 5, line 21 should read --opening 42-- instead of --opening 46--.

Page 9, line 15 refers to figure 3, but no such figure has been filed with the application.

Appropriate correction is required.

Claim Objections

3. Claim 7 is objected to because of the following informality. Claim 7 recites --water-- on line 2. It is believed that the applicant intended to use the term --liquid-- so that it complies with the limitations set forth in claim 1. Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-13 are allowed.

Conclusion

5. This application is in condition for allowance except for the following formal matters noted above. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
